Who We Are

We Make Health Happen

We bring community members, leaders, youth, non-profit and faith-based organizations, and policymakers together to achieve policy and systems transformations that promote equity, justice, and investment in our neighborhoods. Representing more than 97,000 Fresno County residents, we are building a movement to create #OneHealthyFresno for everyone.

Our Mission

To foster and encourage thriving communities where all children and families can live healthy, safe, and productive lives.

Our Core Work

Our work is grounded in the belief that social, environmental, political, and economic factors impact the health and well-being of individuals and the community. We focus on leveraging and building on the strength and history of our community by:

- **Fostering Civic Engagement & Leadership**
- **Elevating the Stories of Our Community**
- **Engaging in Strategic Advocacy & Collective Action**
- **Strengthening Community-Based Organizations**

Our Programs

Youth Internship Program

We offer paid internships to high school students residing in Fresno County to introduce them to career opportunities that leverage their talents, skills, interests, and experience while providing practical knowledge and tools to foster their success. Participants are onboarded annually between March and April and work alongside us until November.

Community Health Worker Certification

We train and certify Community Health Workers by providing foundational job skills, including English literacy, digital proficiency, and culturally responsive training, to enable participants to secure living-wage jobs while advancing community health.

We believe authentic community transformation and long-term positive change can be achieved through the power of community.

Our Focus Areas

We work to garner support for policies, investments, or changes that will improve the quality of life for our community.

We strengthen community health by advancing policies and programs that transform the systems shaping daily life – healthcare, housing, land use, parks, community safety, and transportation – to create lasting prosperity for everyone.
